

E05 Conference / Presentation Information

WinXP-Laptop / Apple iBook for Presentations

We have a Laptop with Win XP and an iBook available for presentations.

PowerPoint is installed on both systems.

In addition keynote 1.1.1 is installed on the iBook.

To avoid delays and/or problems when starting electronic presentations from different equipment it would be very helpful to bring your presentation (PPT, PDF) on a USB drive and/or CDROM so that it can be copied to the conference Laptop / iBook, so that the presentation can be tested before the session.
