

In Situ View of Galaxy Formation 2

Poster Presentations

Presenter

Title

Yixian Cao/Jinyi Shangguan

SMBH masses from GRAVITY observations of the hot dust around AGNs

Jean-Baptiste Jolly

Dust mass and Comoving dust mass density evolution revealed through stacking

Lilian Lee

Disk kinematics at high-z: comparing fitting techniques and modeling tools

Amit Nestor

RC100: rotation curves and dark matter fractions in 100 massive star-forming galaxies at $z = 0.6-2.5$

Taro Shimizu

Measuring the growth of SMBHs from $z=0-2$ with GRAVITY/GRAVITY+

Junkai Zhang / Stijn Wuyts

3D intrinsic shapes of quiescent galaxies in observations and simulations

Charlotte Avery / Stijn Wuyts

Ionized and neutral gas outflows from normal nearby galaxies: feedback in action
